

Daycast™ Core Pins

For Die Casting and Other Casting and Molding Processes

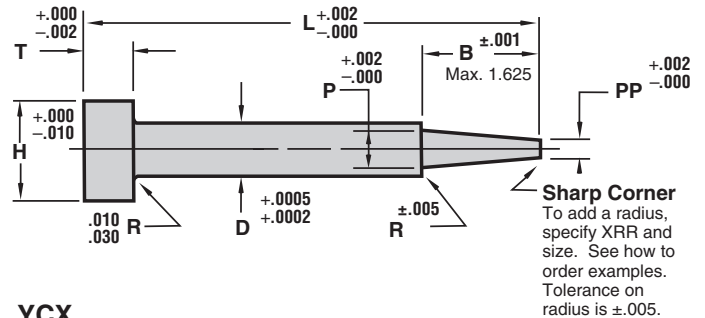

Daycast Core Pins are given a special heat treating process providing an excellent balance of toughness and wear resistance. The wear resistance properties and improved toughness characteristics of Daycast make it an excellent choice for long run applications. Daycast Core Pins are austenitized in an atmospherically controlled furnace at a temperature that provides them with maximum resistance to tempering.

- Precision points on pins up to 6.00 inches are available.
- Superior finish minimizes wear.
- Hardened to Rc 58-60.
- Precision point length and overall length on pointed pins.
- Precision head thickness.
